## II. General Remarks

EP 0 548 391 B1 has been evaluated in the introductory portion of the specification of the present application and relates to a Hall sensor array in which two or four Hall sensor elements are used to compensate the disturbing effect of a particular crystal direction. The angular separation of the individual Hall sensor elements is fixed, lying between  $0^\circ$  and  $180^\circ$ . The angle is chosen according to the crystal direction of the semiconductor material which is used. According to EP 0 548 391 B2, each Hall element is fed from a separate current source, so that a constant current is impressed on each element. The Hall voltages tapped off at the individual Hall elements in the Hall detector are connected in parallel in a switching stage. A common value is thus imposed on the Hall voltages of the individual elements, so that compensating currents may result.

DE 43 02 342 A1 relates to a Hall sensor arrangement having four Hall sensor elements, for example. The four Hall sensor elements are arranged opposite to each other by  $90^\circ$ , wherein the individual hall sensor elements have dedicated current supply terminals and dedicated voltage-sensing terminals. In the Hall-sensor elements according to this document, the current supply electrodes extend along the whole width of the element to obtain a regular current flow. Contrary thereto, the sensing electrodes are arranged at the centers of the respective edge only. With this arrangement, a periodical switching to obtain a spinning current operation is not possible.

The submission of the above documents is not an admission that the information is analogous or otherwise material. It is respectfully requested that the above listed documents be considered and made of record in the present application.

The Commissioner is authorized to charge any fees for this Information Disclosure Statement under 37 CFR §1.17(p) to charge account No. 220259. A duplicate copy of this Information Disclosure Statement is submitted for this purpose.

Respectfully submitted,

September 07, 2002
